Sam Nielsen

Associate

nielsen.sam@dorsey.com
Salt Lake City – 801.579.7498

Sam serves clients by attaining protection for their intellectual property through strategic patent prosecution. He has experience preparing patent applications in the United States and abroad, then prosecuting them before the patent office.

Sam's work has covered a wide range of technologies, including electronics, generative artificial intelligence, biomedical devices, material science, and chemical engineering. Sam pairs his technical expertise with a creative approach to build patent portfolios that capture value from innovation.
