

Stephanie A. Page

Senior Paralegal

page.stephanie@dorsey.com

Minneapolis – 612.492.6843

Stephanie brings focused patent prosecution support that keeps applications moving accurately and efficiently through the U.S. Patent and Trademark Office.

Stephanie has spent her entire paralegal career in patent prosecution, building deep, concentrated knowledge in one of intellectual property law's most process-intensive disciplines. That singular focus means clients and attorneys alike can rely on her to anticipate procedural requirements, track deadlines, and manage the administrative complexity that patent prosecution demands.

Over the course of her career, Stephanie has worked independently on prosecution matters, which required her to develop strong legal research skills to resolve questions across a wide range of patent prosecution issues without immediate supervision. That self-reliance translates directly into practical value: fewer bottlenecks, faster turnaround, and a paralegal who can take ownership of a file from filing through prosecution.

Select Experience

- Supports the international patent portfolio of a biotechnology company developing biometric identification technologies, coordinating patent filings and prosecution activities across numerous foreign jurisdictions and helping ensure compliance with country-specific filing requirements to maintain global patent rights.
- Assists with worldwide design patent protection efforts for a medical device company, including preparation and coordination of Hague Agreement international design applications and foreign filing activities for innovative healthcare products and industrial designs.
- Supports patent portfolio management for a telecommunications technology company in connection with financing, restructuring, and corporate transactions by coordinating patent ownership reviews and intellectual property due diligence activities.
