

# Tyler Jeffs

## Senior Attorney

[jeffs.tyler@dorsey.com](mailto:jeffs.tyler@dorsey.com)

Salt Lake City – 801.933.4021

Tyler Jeffs structures and prosecutes patent applications across mechanical, software, and emerging-technology fields to build U.S. and international patent portfolios that protect what his clients have built.

Tyler brings a mechanical engineer's instinct for how things work to every patent application he drafts and prosecutes. That combination of legal rigor and technical depth lets him translate a client's invention—whether a precision manufacturing process, an artificial intelligence system, or a clean-energy device—into claims that hold up under scrutiny at the United States Patent and Trademark Office (USPTO) and in foreign jurisdictions.

Over the course of his practice, Tyler has drafted hundreds of patent applications spanning mechanical engineering, automotive systems, automation, optics, medical devices, printing systems, scientific testing, self-driving vehicle technology, virtual and mixed reality, and manufacturing. He works with clients at every stage of the innovation lifecycle, from top-tier technology companies managing large global portfolios to early-stage startups filing their first application.

Beyond drafting and prosecution, Tyler counsels clients on the legal and technical dimensions of their patent strategy, helping them make informed decisions about where to seek protection, how to position their portfolios, and when non-infringement or invalidity opinions are needed before a business move. His goal in every engagement is clear communication: clients should understand what they own, why it matters, and what comes next.

## Charitable & Civic Involvement

- Boy Scouts of America

## Education

- Brigham Young University, J. Reuben Clark Law School (J.D., 2012)  
– *cum laude*
- Brigham Young University (B.S., Mechanical Engineering, 2009)

## Bar Admissions

- Utah
- United States Patent and Trademark Office
